

# CLOSER REINFORCEMENTS GUIDE

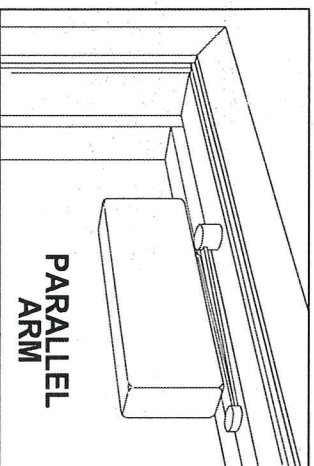

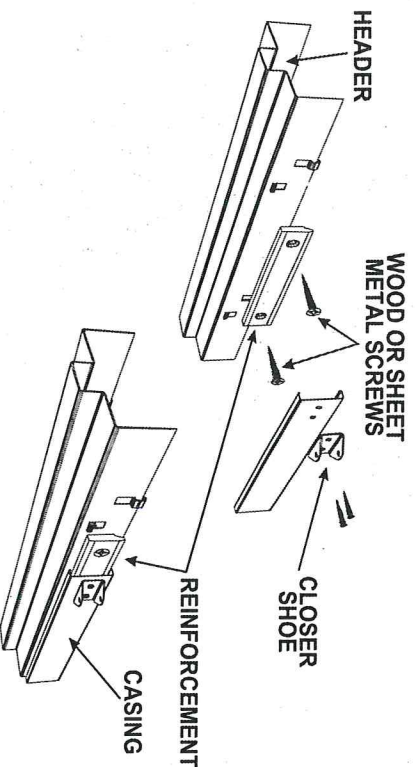

## REDIFRAME

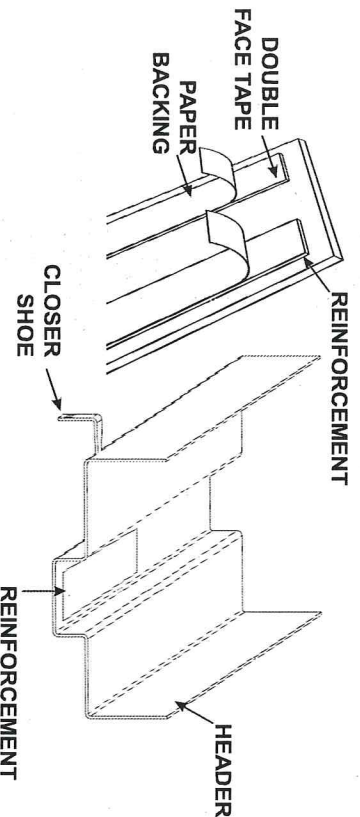

### REGULAR ARM CLOSER INSTALLATION

1. Position closer reinforcement on header where the door closer shoe is to be mounted.
2. Mount the reinforcement flush with the header face.
3. Drill pilot holes (2) in the header through the countersunk holes in the reinforcement and secure with wood or sheet metal screws.
4. Install header casing.
5. Position closer shoe on frame and drill pilot holes through the casing and regular arm closer reinforcement.
6. Tap these holes as per the Closer Installation Instructions.
7. Secure the closer shoe to the frame.

### PARALLEL ARM CLOSER INSTALLATION

1. Locate area where parallel arm closer reinforcement is to be positioned on header. Clean with solvent.
2. Expose double face tape by removing paper backing on the two strips of tape; press into position to secure the sleeve to the header.
3. Drill and tap through frame and reinforcement for closer shoe attachment.
4. Install frame and door in conventional manner.
